info@north40cannabis.com

North 40 Cannabis strives to provide the best products for our medical clients, whether it is grown within our facility or obtained through other licensed cultivators.

All products offered for sale are inspected and tested for total relative THC, CBD and Terpene content, and for biological, foreign materials, heavy metals and chemical contaminants by certified testing laboratories approved by Health Canada.

Products for sale are processed and packaged at our state-of-the-art facility in Saskatchewan; North 40 Cannabis became Canada's first combined Micro-Cultivator and Micro-Processor license holder in 2019. Since that time, North 40 Cannabis has achieved awards for its own unique cannabis cultivars, and is a regular supplier to both Canadian retailers and overseas medical markets in Australia, Germany and other European countries.

As a potential or existing medical cannabis client you must first obtain a Medical Certificate directly from Health Canada or a Medical Document from a licensed health practitioner (Doctor, Licensed Practical Nurse or Medical Health facility). Once a Document or Certificate and prescription is obtained, you can request a Registration Application Form from medical@north40cannabis. As per the *Health Canada Cannabis Regulations*, North 40 Cannabis is obligated to confirm the validity of the Document or Certificate before the Medical Client Registration is issued. Generally, this takes a day or two, but if the Medical Document issuer is known to us and already been vetted, the Registration is issued almost immediately. [WFCC Virtual Medical Clinic](#) is a good way to obtain medical advice and cannabis prescriptions, and as a practitioner known to North 40 Cannabis will expedite the process.

Alternatively, if you already have a registration from another medical supplier, you can request that the Medical Document or Certificate and prescription to be transferred to North 40. By law, that supplier is obligated to honour that request and will send the necessary documents and prescription to North 40 Cannabis.

Once you receive your North 40 Cannabis Medical Client Registration Form, we will also provide you with a fillable *Medical Sales Form.xlsx* to be returned to medical@north40cannabis to start your order.

Dried Cannabis Products

Depending on your taste, North 40 offers a number of varieties with varying amounts of relative THC and CDB amounts in Indica, Sativa or Hybrid cultivars with different terpenes (giving unique flavours and aromas).

Flower

		
<p>North 40 El Gordo 3.5, 7, 14, 28g</p>	<p>29.6% THC, <0.1% CBD, 4.5%, Terpenes</p>	<p>Smooth, flavourful and a very heavy hitter. Super sticky and covered in trichomes.</p>
<p>North 40 El Gordo Jewels 28g</p>	<p>29.6% THC, <0.1% CBD, 4.5%, Terpenes</p>	<p>Smaller buds than our El Gordo but with the same great flavour that packs a mighty punch.</p>

info@north40cannabis.com

North 40 Farm Gas 3.5, 7, 14, 28g	27.6% THC, <0.1% CBD, 2.7% Terpenes	This strain packs a punch with flavours of citrus, spices, and fuel.
Red Barn 91 Royale Diesel 3.5, 7, 14, 28g	31.7% THC, <0.1% CBD, 3.6% Terpenes	A high-THC indica strain known for its potent effects and complex aromas of spicy ginger, gas, chai, and hints of sweet citrus.

Pre-Rolls

North 40 Cannabis also offers ready-made pre-rolled joints in single, double or multi-packs of different weights, using our best milled dried flower, processed and packaged onsite.

		
North 40 El Gordo Pre-Rolls 3 x 0.5g	32.9% THC, <0.1% CBD, 4.2% Terpenes	Smooth, flavourful and a very heavy hitter. Super sticky and covered in trichomes.
North 40 Strawberry Miracle Pre-Rolls 3 x 0.5g	32.2% THC, <0.1% CBD, 2.9% Terpenes	Sativa-dominant cultivar with sweet fruit, woody and spicy flavours
Red Barn Sea Serenity Pre-Rolls 8 x 0.35g	5.1% THC, 7.3% CBD 0.8% Terpenes	High CBD hybrid with light earthy, musky, fruity and floral aromas
Red Barn Sun & Moon Pre-Rolls 3 x 0.5g	8.5% THC, 12.3% CBD, 1.9% Terpenes	Very high CBD hybrid flower that tastes like Cherry Pie
Red Barn Sativa J Pre-Rolls 10 x 0.3g	18.9% THC, <0.1% CBD, 1.5% Terpenes	Sativa pre-rolls with earthy, citrus and spice scents

Milled

For those who prefer pre-milled dried cannabis flower for use in pipes or bongs, North 40 usually has a selection of our best cultivars in this form.

Extracts

Rather than using solvents to derive the rosin base for Extract products, which can leave a petrochemical taste and aroma upon ingestion, North 40 Cannabis generates Rosins by using only heat and pressure applied to the finely-milled dried flower and kief (trichome-encrusted sugar leaves of the flower buds). This method also concentrates the THC, THCa and terpenes in the products.
